

- Take cabinet clip shown to the left and place it into desired hole, at desired height.
- Place one of the small ends of the clip into the hole first and rock it down placing the other end into the hole below.

-Repeat steps one and two, three more times until there are four clips all at the same height, in all four corners of the cabinet.

To the left is how the clip looks once it is in place.

-Place your shelf on top of the four clips making sure the shelf is level all the way across, adjusting accordingly.

To the left is how the shelf looks once it is in place.
